PERSONAL SKILLS

Passionate and open-minded networker with visible public profile
Result oriented negotiator
Empathic leader with ENTJ personality type

I'm a passionate and open-minded leader with extensive policy, program, project and people management skills that I have acquired in both commercial and public sectors over 20+ years of my professional career. My competence in large-scale digital IT transformation programs, product and service developments, public procurement tenders, and multi-national research projects led to significant business impacts at research and innovation actors across Europe and beyond. I follow my engineering mind-set as a global stakeholder engagement specialist and open-source community organizer, predominantly in the public sector, higher education and research industry segment. I'm a result driven team player who is always motivated by challenge where I can efficiently translate strategic objectives and business goals into executable actions. I have a self-starting and self-motivating approach, I'm able to work independently across a global enterprise with awareness and sensitivity to global cultural variations and political situation.
